

## What is the Good Door Facing?

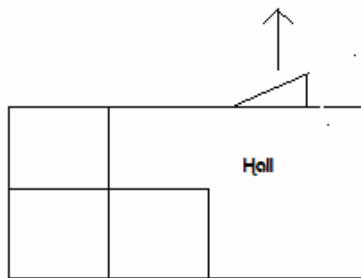

One of the important aspects to consider when selecting a good house is the direction of the main door used to enter a house. As a matter of fact, the feng shui resulted from the direction of the main door could affect the occupants who stay in the house.

All occupants of a house have their own animal signs (zodiac) based on the year they were born. The direction of the main door could affect the Feng Shui of the house and those occupants who were born with certain animal signs could be adversely affected by the Feng Shui.

There is no bad effect if the main door faces any direction of the 8 Heaven Stems [甲 E1, 乙 E3, 丙 S1, 丁 S3, 庚 W1, 辛 W3, 壬 N1, 癸 N3] and 3 Trigram (Ba Gua) [乾 NW2, 坤 SW2; 巽 SE2] of the 24 mountains. Therefore, any direction of the main door of a house that faces the 12 Earth Branches has adverse effects to the occupants of the house. With the main door of a house faces 艮 NE2, the bad feng shui could possibly causes conflict and dispute to those family members with certain animal signs, as listed below.

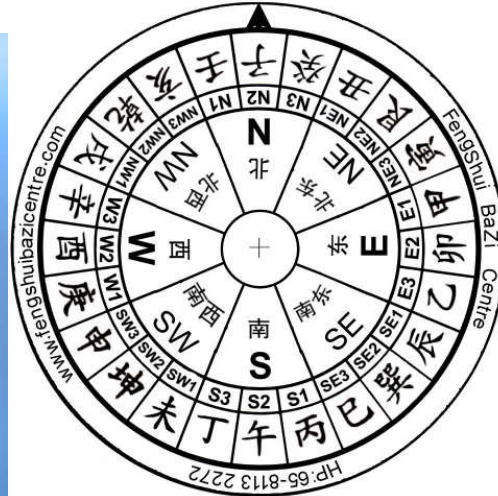

In other words, if the main door of a house faces any direction of the 12 animal signs of a compass, the table below can be used to determine whether the main door is facing a bad direction.

The main door facing is the direction that you stand inside the house and look out at the main door.

This table shows the bad directions for main door to be avoided. If anyone stays in a house with the bad main door direction, the house Feng Shui cannot be used to maximize what the person supposed to enjoy according to his or her fate and luck.

You need to use a compass that have the feature of Chinese 24 Mountain mark on it.
